REQUEST FOR QUOTE FOR CISCO EQUIPMENT

QUESTIONS AND ANSWERS

1. **What is the use case for the two 4500-X switch?**
    A: iSCSI SAN fabric.

2. **What will be connecting to the switches?**
    A: VNX 5300 and Dell servers. No 10G to the Dell server, just the VNX.

3. **What are the uplink requirements?**
    A: 10G to VNX, 1G to all others.

4. **What are the switch to switch requirements?**
    A: None, they are redundant with independent connections to VNX.

5. **Do you have a network topology so Nexus can have a better understanding of the network?**
    A: Yes, but we are not interested in altering our topology.

6. **Regarding power, are these switches connecting to a PDU or an UPS?**
    A: Dual independent power supplies, both on UPS.
